

TABLE OF CONTENTS

VOLUME 1

PROLOGUE

European construction sector towards sustainability Zdeněk Bittnar (Czech Republic)	13
---	-----------

KEYNOTE ADRESSES

Sustainable issues facing the building sector Nils Larsson (Canada)	15
Rating systems in the public and financial sectors Andrea Moro, Adriano Bellone, Giuseppe Piccoli (Italy)	58
Sustainability assessment and/or property rating? Thomas Lützkendorf, David Lorenz (Germany)	63
Sustainable building in the Czech Republic – Challenge and opportunity Petr Hájek, Jan Tywoniak (Czech Republic)	73
Ultra-high-performance concrete: Basis for sustainable structures Michael Schmidt, Thomas Teichmann (Germany)	83
Building with earth - 30 years of research and development at the University of Kassel Gernot Minke (Germany)	89

ECONOMY, POLICY AND LEGISLATION

Resource conservation in existing commercial office buildings John B. Storey (New Zealand)	99
--	-----------

Cost planning for renewal and maintenance over the building life cycle Jaroslava Tománková (Czech Republic)	105
I-divergence function in project evaluation Václav Beran, Petr Dlask (Czech Republic)	111
Strategy for sustainable development in the building sector of Russia, Kazakhstan, and Ukraine Yurij A. Matrosov (Russia)	119
Building's value assessment using the utility and the LCC Renáta Schneiderová Heralová (Czech Republic)	126
The verification of high performance buildings in North America Jiří Skopek (Canada)	132
Questionnaire survey of environmental attitudes, management and performance of Swedish architects and technical consultants Liane Thuvander, Birgit Brunklaus, Pernilla Gluch, Karin Johansson, Örjan Lundberg, Ann-Charlotte Stenberg (Sweden)	143
Bottom-up or top-down instruments for more sustainable buildings? Susanne Geissler (Austria)	150
One m² infrastructure for one m² floor space?! Clemens Deilmann, Karin Gruhler, Jörg Hennersdorf (Germany)	158
Immo-rate: Guide for the property rating of sustainable buildings Robert Lechner (Austria)	164

ASSESSMENT METHODS

LEnSE methodology for sustainability assessment of buildings Katrien Putzeys, Johan Van Dessel (Belgium)	171
Life cycle assessment – The first step towards sustainability Timothy Cole (USA)	182
Environmental assessment of a low-energy house Roman Rabenseifer (Slovakia)	187
Implementation of SBTool in the Czech Republic – Case studies Martin Vonka, Antonín Lupíšek, Luděk Vochoč, Vladimír Žďára (Czech Republic)	196
Aiming at sustainability by use of life cycle cost assessment in decision making in planning and design of new buildings and in refurbishment Guri Krigsvoll (Norway), Pavel Frolka (Czech Republic)	197

The critical role of process in developing a green building rating system: The LEED for homes experience	202
Ann V. Edminster (USA)	
Contribution of innovation technology to sustainable construction	212
Jacopo Gaspari, Maria Antonia Barucco (Italy)	
Designing and building green in Australia and the case of Centralplaza	221
Steve Burroughs (Australia)	
Regional strategies for the development of sustainable building	227
Adriano Bellone, Giuseppe Piccoli, Andrea Moro (Italy)	
Environmental and life cycle assessment of structural design of residential house-case study	232
Jan Růžička, Ctislav Fiala, Antonín Lupíšek, Jan Mukařovský, Martin Vonka (Czech Republic)	
Four brick passive houses with "TOTAL QUALITY" certification	240
Gerhard Koch (Austria)	
Influence of wear on building – lifetime	247
Václav Kupilík (Czech Republic)	
POSTER	
Qualitative and quantitative assessment of sustainable urban neighbourhoods	253
Jana Zdráhalová (Czech Republic)	
EDUCATION AND INFORMATION	
<hr/>	
Becoming sustainable: Learning in demonstration projects	259
Barbara Rubino (Sweden)	
Thermomodernisation of public buildings conducted in accordance with conditions of sustainable development – STEP	266
Aleksander Panek, Jerzy Sowa (Poland)	
Data base of planning know how for passive houses	272
Tania Berger (Austria)	
Training for renovated energy efficient social housing	276
Bruno Peuportier (France), Uli Neumann (Germany), Jan-Olof Dalenback (Sweden), Arne Nesje (Norway), Tamas Csoknyai (Hungary), Chiel Boonstra (The Netherlands)	

Prediction of a building energy conservation market Dalibor Vytlačil (Czech Republic)	283
Postgraduate course "Sustainable construction" at Graz University of Technology Peter Maydl, Karin Pregartner (Austria)	287
Postgraduate education in building science at Danube University Krems Peter Holzer, Renate Hammer (Austria)	293
Sustainable building education at Faculty of Civil Engineering CTU in Prague Karel Kabele, Jiří Novák, Jan Tywoniak, Petr Hájek (Czech Republic)	299
Holistic system of SB education in Building University in Moscow Alexander Tetior (Russia)	304

BUILDING DESIGN

Energy efficiency in commercial buildings Günter Löhnert, Sebastian Herkel, Karsten Voss, Andreas Wagner (Germany)	310
Energy, technology and social context Joseph Cory (Israel)	323
Building of ecological education centre Slunakov Ondřej Hofmeister, Pavel Kopecký, Jan Tywoniak (Czech Republic)	331
Simplified method of designing an air-ground heat exchange Szymon Firlag, Joanna Rucińska (Poland)	337
Design of net zero energy housing Vera Straka, Mark Gorgolewski (Canada)	343
Thürnlhofstrasse/Rochègasse/Trepulkagasse – Vienna 11th district – An example for sustainable building process Georg W. Reinberg (Austria)	353
Sustainability of olympic buildings – Guidelines for sustainable architecture of mega-sporting events Natalie C. Eßig (Germany)	361
Passive house technology for multiple-unit houses in Vienna and Lower Austria Martin Treberspurg, Ulla Ertl (Austria)	369
Lessons in building in a sustainable manner in a developing country: The habitat research and development centre, Namibia Jacques Korrubel (Namibia)	375

How potential builders are testing passive houses Helmut Bruckner (Austria)	386
Parametric design strategy aiming at environmentally sustainable residential buildings Hanne Tine Ring Hansen, Mary-Ann Knudstrup, Per Heiselberg (Denmark)	391
Solar systems for passive buildings – General approach and examples Jan Tywoniak, Kamil Staněk, Marek Ženka, Petr Morávek (Czech Republic)	397
100% solar heated monolithic clay bloc house Georg Dasch, Katharina Liepach (Germany)	405
Retrofit buildings close to passive house standard Karl Viridén (Switzerland)	411
Environmentally based optimization of RC slab floor structures Ctislav Fiala, Petr Hájek (Czech Republic)	416
POSTERS	
Material substance of contemporary industrial architecture Ján Ilkovič, Ľubica Ilkovičová (Slovakia)	424
Durability, reliability, sustainability and client's decision Břetislav Teplý (Czech Republic)	430

VOLUME 2

INTERNAL ENVIRONMENT

Modelling of indoor environment quality in sustainable building Karel Kabele, Pavla Dvořáková (Czech Republic)	437
Physical cavity of a double-skin facade – Experiment in-situ Milan Bielek, Boris Bielek, Daniel Szabó (Slovakia)	445
The influence of windscreen on wind flow Katarzyna Klemm (Poland)	451

Solar and daylight rights in concept of performance based buildings Jozef Hraška (Slovakia)	457
---	------------

Acoustic aspects of sustainable building Pavel Oravec, Michaela Kozáková (Czech Republic)	462
---	------------

POSTERS

Sustainable greenery as an insulate rooftop in municipal buildings, also playing in municipal gardens Sergi Lopez-Grado i Padreny, Ana Maria Prados Fernández (Spain)	468
---	------------

Floorings in buildings from lifetime point of view Věra Suchá (Czech Republic)	469
--	------------

EXTERNAL ENVIRONMENT

Sustainable buildings in interaction Morten Elle (Denmark)	474
--	------------

Effects of future city developments – Development scenarios of municipalities Karin Gruhler, Clemens Deilmann (Germany)	480
---	------------

Sustainable urban development strategies for the provision of low-income housing in Pakistan Muhammad Ali Tirmizi (Pakistan)	486
--	------------

Tectonic landscapes Boguslaw F. Witkowski (Belgium)	493
---	------------

Display of commercial activity in architecture of industrial buildings Lubica Ilkovičová, Ján Ilkovič (Slovakia)	499
--	------------

Study on the building conversion for temporary use by public sector Toru Eguchi, Shuichi Matsumura, Makoto Tsunoda, Akiko Inagawa, Ryunosuke Mitate (Japan)	505
---	------------

Deep ecologization as topical basis of ecological construction Alexander Tetior (Russia)	514
--	------------

Influence of urban structure on microclimatic conditions in virtual residential districts Katarzyna Klemm (Poland)	520
--	------------

ENERPOS: A French research program for developing new methods for the design of zero energy buildings in hot climates	527
François Garde, Alain Bastide, Etienne Wurtz, Françoise Thellier, Gilbert Achard, Oana Dobre, Eric Ottenwelter, Alain Bornarel (France)	

ENERGY

Energy and environmental audit for sustainable buildings	537
Dušan Petráš (Slovakia)	
"Zero-energy/emission-buildings" – Terms, definitions and building practice	547
Karsten Voss, Miriam Kramp (Germany)	
Low energy and smart buildings – Analysis of energy consumption in the all life cycle of buildings	553
Małgorzata Fedorczyk-Cisak, Antoni Stachowicz (Poland)	
Barriers for progress of low-energy construction	563
František Macholda (Czech Republic)	
Glazed facades and their influence on indoor climate in buildings	571
Michal Jaroš, Jitka Mohelníková, Dalibor Plšek (Czech Republic)	
Environmental payback of stone wool in a societal energy perspective	577
Anders Ulf Clausen (Denmark)	
Influence of micrometeorological conditions in a street canyon on energy characteristic of a building	583
Marcin Idczak (Poland)	
Experimental examination of energy and micro-climate properties in two low-energy buildings	589
František Kulhánek (Czech Republic)	
Comparison of TRYs for Bratislava	593
Roman Rabenseifer (Slovakia), Geoff Levermore (UK), Sabine Hoffmann (Germany)	
Slab cooling system design using computer simulation	599
Miloš Lain, František Drkal, Vladimír Zmrhal (Czech Republic), Jan Hensen (The Netherlands)	
In search of equilibrium in Canadian housing	606
Woytek Kujawski (Canada)	
Heat storage for energy demand reduction in low-energy buildings	616
Milan Ostrý (Czech Republic)	

Connection of solar and near-surface geothermal energy in ISOMAX technology	622
Edmond Krecke (Luxemburg), Roman Ulbrich, Grzegorz Radlak (Poland)	

Energy balance of windows, solar gains and losses in passive house	629
Miloš Kalousek, Pavel Kúdela (Czech Republic)	

Guidlines on supplementary lighting related to the total daylightindex (TDI)	638
Dariusz Heim, Eliza Szczepańska (Poland)	

POSTERS

Reference building physical model of panel system T06B	644
Roman Rabenseifer (Slovakia)	

Use of water power – Small water power plant in Liběchov	647
Ladislav Satrapa, Martin Králík (Czech Republic)	

Light external walls and thermal stability of a room	654
Monika Zachařová, Sylva Klímová, Danuše Čuprová (Czech Republic)	

The energy efficiency of supplementary lighting systems	660
Dariusz Heim, Eliza Szczepańska, Marek Jabłoński (Poland)	

MATERIALS

Resource efficiency – The Cinderella of the efficiency debate	664
Holger Wallbaum (Switzerland)	

Structural connections with thermal separation	672
Zuzana Šulcová, Zdeněk Sokol, František Wald (Czech Republic)	

Fibreconcretes with aggregate from recycled materials	678
Jaroslav Výborný, Jan Vodička, Hana Hanzlová, Vladimíra Vytlačilová (Czech Republic)	

PURR-e: Tool for a green cities design	683
Leszek Świątek (Poland)	

Design for disassembly and recycling – Using radio frequency identification (RFID) technology to facilitate whole life actions for sustainable construction	691
Graham Paterson, Steven Taylor (UK), Philip Crowther (Australia)	

Earthen architecture – Regional cultural heritage	702
Hana Urbášková, Ivana Žabičková (Czech Republic)	

Inclined green roofs – Ecological and economical advantages, passive heating and cooling effects Gernot Minke (Germany)	708
Savings of natural resources by the use of elements from recycled municipal waste in building construction Jan Mukařovský, Petr Hájek (Czech Republic)	716
Prefabricated load bearing wall panels – Effective technologies for earth structures Jan Růžička (Czech Republic)	723
Disolution of fibers used in insulating materials production Marie Strnadová, Jiří Hamáček, Aleš Helebrant (Czech Republic)	729
Industrial unfired loam brick buildings with passive house standard Christine Kunze, Mario Kubista, Karl Macho (Austria)	735
Use of ignition layer in production of sintered fly ash aggregate Veronika Kalová (Czech Republic)	741
Burnt oil shale – Main constituent of portland cement Lembi-Merike Raado, Viive Nurm (Estonia)	746
Mechanical and hygric properties of FGD gypsum modified by secondary raw materials Pavel Tesárek, Eva Mňahončáková, Miloš Jerman, Robert Černý (Czech Republic)	752
Basic formulation of environmental design, maintenance and repair optimization of concrete structures Petr Štěpánek, Jan Plšek (Czech Republic)	758
Simulation of behaviour of FRC with recycled aggregate Alena Kohoutková, Iva Broukalová (Czech Republic)	766
Concrete mix and environmental load in the context of durability and reliability Pavel Rovnaník, Břetislav Teplý, Pavla Rovnaníková (Czech Republic)	772
Research of the substitution of bonding and modification material in the grouting system Pavla Matulová (Czech Republic)	779
Column behaviour of austenitic steel hollow sections Michal Jandera, Josef Macháček (Czech Republic)	786

POSTERS

Developing of new non-metallic concrete reinforcement	792
David Horák, Petr Štěpánek, Pavel Krůpa (Czech Republic)	
Frost resistance of self-compacting concrete	798
Januzs Szwabowski, Beata Łązniewska (Poland)	
Expandable dwelling system – For cheap and fast erection and dismantling	804
Pavel Truksa (Czech Republic)	
Utilization of hemp as a filler of cement-bonded particleboards	810
Jiří Bydžovský, Filip Khestl, (Czech Republic)	

COMMERCIAL PRESENTATION

Cihelný system HELUZ pro nízkoenergetické stavění	814
HELUZ cihlářský průmysl, v. o. s. (Czech Republic)
